

and not subordinate them one to another, making the most exacting support in a constant effort to develop comprehension and mutual respect.

This situation is regarded in political circles as Premier Poincaré's frank warning to Downing street that the pro-French abstention of the cabinet is further sacrifice of France's claims.

British Work on Note.

[Copyright: 1923. By New York Times.] LONDON, July 15.—[Special.]—The draft of the note which the British government proposes to submit to the allied governments with a view to its being sent later to the German government is expected to arrive in London on Tuesday. The greatest secrecy is maintained concerning its contents.

Notwithstanding Premier Poincaré's disclaimer, it is expected that the draft of the note will be sent to Paris as arranged, but whether it is the issue in tomorrow's special United States senatorial election in Minnesota, as viewed by the country at large.

While the state's electors primarily are concerned with selection of a successor to the late Senator Knute Nelson, the manner in which the contest has been caused by its acceptance generally as a test of the national administration.

Gov. J. A. O. Preus, twice chosen chief executive of the state, is the Republican candidate, and adherent of the Harding administration. He was nominated in the June 13 primary from a field of nine.

Opposing him is Magnus Johnson, Farmer-Laborite, whose announced intention is to affiliate with the La Follette group in congress if he is elected, although he declares he will "accept distinction from no one."

Depends on Democratic Vote.

The third candidate is James A. Carley, state senator, and the Democratic candidate, conceded no prospect of victory even by prominent members of his own party. The vote he will poll, however, may have important bearing on the contest.

Just what the vote will be tomorrow is problematical. On its size, Republican leaders say, depends the fortune of their candidate.

While Republican spokesmen were saying tonight that Gov. Preus "would be elected if the Republican vote turned out," the Farmer-Laborite headquarters made an outright prediction of victory for Johnson by "at least 40,000 votes."

The principal pique in measuring the relative strength of Gov. Preus and Johnson in the general election last fall, when Gov. Preus was re-elected chief executive over Johnson by a plurality of 14,000 votes is expected to influence the whole of the Ruhr.

The incident represents the first fruits of the French policy of direct pressure on the German authorities.

The French and Belgian position has always been that the Germans were able to suppress sabotage whenever they pleased. As a result of this official position, they have imposed taxes and fines on the population whenever sabotage occurred.

Trial of Paying Fines.

The people of Essen finally tired of paying fines for the offenses of others and the pressure on the local police was accentuated from the population itself until the police were obliged to act.

Since the closing up of a Belgian train at Dierik, the German authorities quiet in the Ruhr until today's incident.

Extended Closing of Frontier.

The closing of the frontier between occupied and unoccupied Germany was extended today until July 26 because of the recent abduction of a French patrolman south of Barmen.

A total of 1,500,000 marks for Ruhr relief and pay for the passive resistance was raised yesterday by the French at several points. This brought the week's bag of marks up to 13,000,000,000. A guard is still watching the gate of the Heilmann in Essen, and he will remain there until the directors open it. The same situation exists at Limburg.

Ruhr Pleads for Fresh Air.

[Copyright: 1923. By New York Times.] BERLIN, July 15.—Under a French army order, all windows must be closed from 3 p. m. until 6 a. m. in Essen and other Ruhr towns, despite the temperature of nearly 100 degrees from which central Europe is suffering. In an appeal to the French general, the labor unions of the Ruhr today asked permission to open windows at night and to allow street cars to run, since under the present traffic restrictions many workers are forced to walk for hours to reach their jobs. Several it is claimed, have died from the heat. The unions also asked that the telephone be put back in use, since doctors cannot be reached, even in most serious and unreported cases.

LA FOLLETTE OR HARDING? ISSUE IN GOPHER STATE

See Preus Election Today if Vote Is Heavy.

St. Paul, Minn., July 15.—[By the Associated Press.]—Harding or La Follette—that is the issue in tomorrow's special United States senatorial election in Minnesota, as viewed by the country at large.

While the state's electors primarily are concerned with selection of a successor to the late Senator Knute Nelson, the manner in which the contest has been caused by its acceptance generally as a test of the national administration.

Gov. J. A. O. Preus, twice chosen chief executive of the state, is the Republican candidate, and adherent of the Harding administration. He was nominated in the June 13 primary from a field of nine.

Opposing him is Magnus Johnson, Farmer-Laborite, whose announced intention is to affiliate with the La Follette group in congress if he is elected, although he declares he will "accept distinction from no one."

Depends on Democratic Vote.

The third candidate is James A. Carley, state senator, and the Democratic candidate, conceded no prospect of victory even by prominent members of his own party. The vote he will poll, however, may have important bearing on the contest.

Just what the vote will be tomorrow is problematical. On its size, Republican leaders say, depends the fortune of their candidate.

3 000 Spiritualists Gather for Convention in Indiana

Anderson, Ind., July 15.—[Special.]—More than 3,000 spiritualists attended the opening of the thirty-third annual camp meeting of the Indiana Association of Spiritualists today at the Chestnut field camp, five miles west of Anderson. Outside of Indiana, Illinois, Ohio, and Michigan had the largest representation. One party in six automobiles came from Rockford, Ill. Hugh G. Burroughs of Cleveland, O., and Mrs. Anna Townsend of Indianapolis, were the principal speakers today.

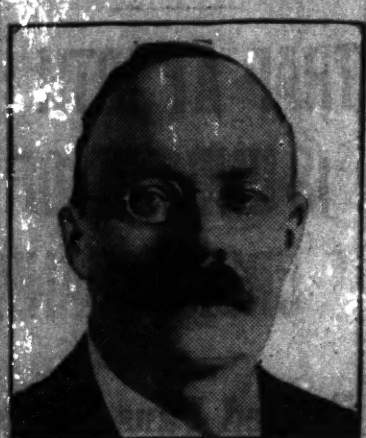

Four Youths Are Held as Robber Suspects

Alfonso Ziellinski, 19 years old, 5223 South Sacramento avenue; Frank Barowski, 2214 South Albany avenue; Benjamin Bartowick, 17, 2220 South Sacramento avenue; and Edward Sloan, 15, 1523 South Keeler avenue, were arrested yesterday on suspicion of having committed several robberies in the Lawndale district during the last few months.

Minnesota Rivals

Gov. J. A. Preus, Republican candidate in state election which will be held today.

Magnus Johnson, Farmer-Labor candidate, who is claiming victory by 40,000.

Two of 'Famous 300' GO ON POLICE PENSIONS TODAY

Two veterans of the police department, both of whom joined the force with the "famous 300" in 1884, go on the pension list today. They are Louis Sam Collins of the Irving Park station since 1897. He resides at 3933 North Tripp avenue. Johnson, who at one time was a sergeant, put in twenty-five years in the loop district. He was conferred with the detective bureau for a long time and while there made many out of town trips for fugitives. He lives at 1821 Catalpa avenue.

With the retirement of Lieut. Collins and myself, said Johnson, "only ten of the 300 are left on the force. We went on Dec. 16, 1884. It was the coldest night I ever experienced. Some of the boys had their ears frozen."

Austin Doyle was chief of police before we went out to travel beat that night he addressed us. "Keep a clear head," he said, "and your feet warm. Keep out of saloons and you will last a long while on the department."

"That isn't bad advice to give the men who join the police force today."

FIRE CAUSES \$5,000 LOSS.

Fire in the rear of the Dryden Rubber company, 2114 South Kildare avenue, yesterday did damage to the extent of \$5,000 before it was extinguished.

4 DIE, 14 HURT BY AUTOMOBILES OVER WEEK-END

Four Injured in Sheridan Road Collision.

Arthur Jones of Glenwood and Miss Wylie Hodgson of Lynn, Conn., driver in one car, and Charles Felman, 814 Crescent place, and Miss Betty McDonald of 4746 Kenmore avenue were all badly hurt early this morning when their cars collided at Sheridan road and Aldine place. All were taken to the Columbus Memorial hospital. Both cars were smashed.

Four persons died and ten others were reported to have been more or less seriously injured as the result of automobile accidents yesterday.

The dead are Mabel Knudson, 5 years old, 3409 Illinois street; Alexander Dennison, 45 years old, 921 North La Salle street; Martin Shantanus, 1236 Virginia avenue, and an unidentified man.

Both the girl and the aged man were struck by auto trucks on Saturday. The little girl was struck by a truck driven by Anthony Gladys, 497 Grand avenue. He was held by the Austin police, who stated that he has no chauffeur's license, and that his truck bore no state license.

Walls in Front of Truck.

Dennison was struck by a truck driven by William Brewer, 2927 North Albany avenue, while crossing the street at Wells and Oak streets. Witnesses said the aged man walked in front of the truck. Brewer was not held.

Shantanus was fatally injured and Mrs. C. A. Johnson, 4360 Laflin street, was hurt when Shantanus' car collided with an automobile driven by Emil Ackerman, 5425 Indiana avenue, at Deerfield, Ill. Johnson and four passengers in Ackerman's car were not injured.

Ackerman was taken to Waukegan and lodged in jail for four hours following the accident. He was booked on a charge of manslaughter and released on \$2,000 bond.

The unidentified man, apparently a laborer about 35 years old, was killed while crossing State between 13th and 14th streets. Eight men were riding in the auto which struck him. Two of these, Angelo Michalein, Ogden avenue and Ross street, and Anton Zimmer, 301 Star street, are held.

Those Who Were Hurt.

The list of the injured includes Charles Schmalz, 13 years old, 1927 South Kostner avenue; Edwin Baas, 12 years old, 1554 South Kostner avenue; Bob T. Fawcett, 1427 Foster avenue; Albert Tarrois, 2787 East 28th street; Julian Follin, 3220 Wilcox street; Louis Fox, 1572 West 13th street; Philip McGinnis, 110 South Parkside avenue; Mrs. Mary Stelmach, 24 years old, Lawrenceburg, Ind., and Elmer Deany, 9 years old, Evanston.

Slain Bandit's Mother Dies of Broken Heart

Champaign, Ill., July 15.—[Special.]—Mrs. Kate Walton died late last night of a broken heart. Her death is the second in the family resulting from the act of a son gone wrong three years ago. The son, Roy, a railway postal clerk, turned bandit and was shot to death in a battle with police in Chicago after he had held up an Illinois Central train and killed a Chicago policeman. The husband died while en route to claim the body of his slain son.

HANDS OF DEATH

The clock indicates the number of deaths caused by automobiles, guns, and moonshine in Cook county since Jan. 1.

FIERY GENERAL KEEPS SPAIN ON ANXIOUS SEAT

[Copyright: 1923. By New York Times.] MADRID, July 15.—[Tribune Radio.]—The Spanish cabinet decided today to adjourn parliament at the end of this month in order to have a free hand to dispose of Gen. Aguilera, Fascist chief and present head of the supreme war and navy council, who has been threatening to set up a military dictatorship.

Gen. Aguilera maintains his defiant attitude, and it has become increasingly obvious in the last week that he is supported by parliament. In order to forestall Gen. Aguilera's plan to force to trial political as well as military chiefs responsible for the disastrous Moroccan campaign, the government finds itself faced with the necessity of removing the general from his high position or run the chance of a coup d'état.

The government's wish to avoid the trials is based on the knowledge that some of the highest officials of the kingdom are sure to be drawn in during the course of the prosecution.

MRS. MEEKER OPERATED ON; OUT OF DANGER

Mrs. Arthur Meeker, 3030 Lake Shore drive, wife of Arthur Meeker of Armour & Co., and prominent society woman, is ill at St. Luke's hospital. She was taken to the hospital after several physicians had held a consultation a week ago, and was operated on for tumor by Dr. Thomas J. Watkins last Monday. Mrs. Meeker, it is said, had been ill for several weeks.

Mrs. Meeker, who has constantly been at his wife's bedside, said she is fast recovering and out of danger.

ROSE LEAF SALAD

Apuleius, the Roman philosopher, immortalized a salad made of rose leaves;

Yet it was not more delightful to look upon, nor more delicious to taste,

Than the salad made of cool, crisp leaves of lettuce, topped with slices of ripe tomato,

And served with a piquant dressing and a dash of peprika at CHILDS.

Lettuce and tomato salad, refreshing and exhilarating by virtue of its wealth of vitamins

GOMPERS PUTS SHARP QUERIES TO RED RUSSIA

Washington, July 15.—[Special.]—In a letter addressed to Senator Kinn (Conn., Rep.) and Senator Ladd (N.D., Rep.), who have just called for Europe to visit Soviet Russia, Samuel Gompers, president of the American Federation of Labor, suggests a number of questions which he would like to have answered relative to Russian conditions.

Mr. Gompers says that the senators should seek to make clear to Soviet authorities that certain policies which they have adopted serve as an insuperable barrier to the recognition of the Soviet government.

The questions propounded by Mr. Gompers include the following:

"Is it true that there is no free press in Russia?"

"Are workmen permitted to organize

without interference from the government?"

"Is it true that the leading officials of the Soviet government, of the communist party, and of the third international are the same persons?"

"To what extent is the Soviet government supporting or at least permitting the third international to conduct propaganda hostile to foreign governments?"

"Individually and collectively, responsible spokesmen of the Soviet government declare that the government is no longer a strictly communist organization but that, on the contrary, it is almost a model of such republics as the United States. If this is really the case, why does the Soviet government actually and officially change its character to conform to the declarations just mentioned?"

"If the Soviet government is willing to acknowledge its legitimate foreign obligations why does it not definitely, at least in principle, go on record to such effect?"

POLITICAL STORM BREAKS AGAINST WOOD IN MANILA

Cabinet Member Resign Others May Quit

BY WALTER WILGUS

[Copyright: 1923. By The Chicago Tribune.] MANILA, July 15.—The great hostility of Filipino political leaders to Gov. Leonard Wood, which has been maturing for months, culminated last night in the resignation of Jose P. La. secretary of interior, and a sharp letter to Manuel Quezon, president of the Philippine senate, wherein the latter was informed that Filipino cooperation would be lessened unless greater attention was paid to their desires.

The resignation of Mayor Ben Fernandez of Manila is a possible result of the cabinet changes by the cabinet ministers in addition to Laurel will quit.

Opposed Wood Action.

Mr. Laurel's resignation was due to an order from Gov. Wood to resign. Mr. Laurel, an American, chief of secret service, who recently was elected secretary of department, was resigning committee appointed by governor. Mr. Laurel, who has a reputation as a statesman, had been in Manila since last night that he would order left him on other orders to resign. Up to a late hour Wood had not accepted the resignation.

Mr. Quezon's letter to Gov. Wood read in part:

"Permit me to inform you in all sincerity that there is a growing feeling among our people that the views of the Philippine officials of this government, secretaries of department, chiefs of police, and other officials, are not in harmony with the views of the people. It is this feeling, if it is allowed to stand, it will be very difficult to serve the utmost cooperation of the Philippine people, who are convinced that you have little confidence in their loyalty or ability."

Agitation for Republic.

Agitation to call a convention to draft a constitution for a Philippine republic continues, but the more conservative elements of the government are not willing to take such a step, as they fear it might give themselves open to charges of sedition by the United States.

DR. KAUFMAN OF EVANSTON FOUND AMNESIA VICTIM

Quebec, Que., July 15.—[Special.]—Dr. Joseph Kaufman of Evanston, Ill., missing since last Friday, when he appeared after mounting the steps in front of the Hotel de Ville, was found today in Montreal, where he was joined by his wife. The physician was recognized by a newspaper man who had read of his disappearance in a paper. He stated that he had been in the city since last Friday, when he was taken to the hospital. He was suffering from amnesia, two hours after he had arrived in Quebec with his wife.

Hunt Woman in Swamp

Wausau, Wis., Ax. Wild

Wausau, Wis., July 15.—Mary Wando, 20, is being sought by menbers of a sheriff's posse in a swamp near Rothschild, six miles south here. The swamp, which is five miles long and one of the most in the county, is a place where it is possible to lose one's way. It is believed to have the only person who can explain how Mrs. Wando was lost. Mrs. Wando received twenty and bruises, thought to have been inflicted by a small ax Tuesday night, while asleep in her home.

**POLITICAL STORM
BREAKS AGAINST
WOOD IN MANILA**

**Cabinet Member Resigns,
Others May Quit.**

BY WALTER WILGUS.
(Chicago Tribune Foreign News Service.)
(Copyright 1933: By The Chicago Tribune.)

MANILA, July 15.—The growing
hostility of Filipino political leaders
to Gov. Leonard
Wood, which has
been maturing for
months, culminat-
ed last night in the
resignation of Jose
P. Laurel, secre-
tary of the interior,
and a sharp letter from
Manuel Quezon, president of the
Philippine senate,
to Gov. Wood, wherein the lat-
ter was informed
that Filipino cooperation would cease
unless greater attention was paid to
their desires.

The resignation of Mayor Ramon
Fernandez of Manila is a possibility,
and it is freely predicted that several
cabinet ministers in addition to Mr.
Laurel will quit.

Opposed Wood Action.
Mr. Laurel's resignation was due to
an order from Gov. Wood to reinstate
Max O'Neil, an American, chief of the
secret service, who recently was
charged with bribery charges by an in-
vestigating committee appointed by the
governor. Mr. Laurel, who has con-
sistently opposed the reinstatement of
Mr. O'Neil, said last night that Gov.
Wood's order left him no other course
open but to resign. Up to a late hour Gov.
Wood had not accepted the resigna-
tion.

Mr. Quezon's letter to Gov. Wood
read in part:

"Permit me to inform you in all sin-
cerity that there is a growing feeling
among our people that the views of
the Filipino officials of this govern-
ment, secretaries of departments in-
cluded, have little if any weight with
you. It is feeling in allowed to
stand it will be very difficult to pre-
serve the utmost cooperation of the
Filipinos when they are convinced
that you have little confidence either
in their loyalty or ability."

Agitate for Republic.
Agitation to call a convention here
to draft a constitution for a Philippine
republic continues, but the more con-
servative leaders are not willing to
take such a step, as they fear they
will lose themselves to charges of
sedition by the United States.

**DR. KAUFMAN OF
EVANSTON FOUND;
AMNESIA VICTIM**

Quebec, Que., July 15.—(Special.)—
Dr. Joseph Kaufman of Evanston, Ill.,
missing since last Friday, when he dis-
appeared after mounting the steps that
led to the Citadel, was found today in
Montreal, where he was joined by his
wife. The physician was recognized
by a newspaper man who had read the
story of his disappearance in a paper.
He wired the chief of detectives in
Quebec and Mrs. Kaufman departed
at once for Montreal.

Dr. Kaufman, it was said, had wan-
dered out on the core fields, after-
ward making his way down to St.
Louis street, where he took an auto-
mobile to the railroad station and
boarded a train for Montreal, while
suffering from amnesia, two hours
after he had arrived in Quebec with
his wife.

**Hunt Woman in Swamp as
Wausau, Wis., Ax Wielder**

Wausau, Wis., July 15.—Mary Ka-
wanda, 26, is being sought by mem-
bers of a sheriff's posse in a swamp
near Rothschild, six miles south of
here. The swamp, which is fifteen
miles long and one of the most inac-
cessible in Marathon county, is be-
lieved to have the only person who
can explain how Mary Walter Kawanda
of Rothschild received twenty cuts
and bruises, thought to have been in-
flicted by a small ax Tuesday night
while asleep in her home.

"Petting Ring" Accused and Accusers

**MAN PAYS WITH
LIFE FOR THAT
OF AUTO VICTIM**

**Killed by Father of Boy
He Ran Down.**

"You say Paparone didn't? Yes,
Well, he killed my Mike and I kill him,
that's even huh?"

Daniel Gallella paced his cell at the
jailhouse yesterday. He was con-
fronted by the police told him that
Louis Paparone, 1947 Taylor
street, had died at the county hospital
where he was taken Saturday night
after Gallella had shot him three
times.

Paparone, who was president of the
Independent Ice Cream company and
Gallella have been enemies since
Paparone was exonerated by a cor-
oner's jury a year ago after an auto-
mobile truck he was driving struck
and killed Michael Gallella, 6 years old.

Children Quit Their Play.
Late Saturday night Paparone
stopped his truck a few doors from the
Gallella home at 1010 Sholto street.
Gallella was watching his children play
on the sidewalk. The sudden appear-
ance of the truck that killed their
brother drove them into the house.

Paparone after delivering a tub of
ice cream to a near by store, mounted
his truck and proceeded to turn
around. The rear wheels of his truck
struck the car, in front of the
Gallella home.

"Hey, why don't you take it a little
easy," yelled Gallella. "What do
you want to do, kill another baby?"
and Gallella jumped to his feet.

Instantly Mike to violence.
"What are you holering about, you
got nine kids left," Paparone answered.
That was too much, Gallella ran
into the house, grabbed his revolver
and fired three shots. They all took
effect. Paparone dropped to the street.
Gallella will be arraigned in court
this morning and a charge of murder
placed against him.

**Evan Fontaine Wins Point
to Halt Perjury Hearing**

New York, July 15.—Evan Burrows
Fontaine, dancer, and her mother, have
won a point in a suit to halt a per-
jury hearing. A second indictment charging
them with perjury in connection with
Miss Fontaine's \$1,000,000 breach of
promise suit against Cornelius Van-
derbilt Whitey, Supreme Court Jus-
tice Seeger has granted a motion of
Edward J. Collins, their attorney, which
will permit him to inspect the minutes
of the grand jury which returned the
second indictment.

**Host of Noisy Saturday
Night Party Under Arrest**

A Saturday night party at which
the neighbors alleged too much noise
was greeted last to the arrest yester-
day of L. J. Fisher, 1524 Birchwood
avenue, who claims he is a brother of
Circuit Court Judge Harry Fisher.
Complaining alleging disorderly conduct
were signed against him by C. H. Shep-
herd, 1535 Birchwood avenue, formerly
a Lincoln park commissioner, and H.
C. Manship, 1531 Birchwood avenue.

**RAINBOW VETS
HAIL 'KILL MANY'
GOURAUD TODAY**

**Many Fetes Await Arrival
of French Hero.**

(Picture on back page.)
"The bombardment will be terrible.
You will support it without weakness.
The result will be fierce, in a cloud
of smoke, dust and gas, but your po-
sition and your armament are formid-
able. In your breasts beat the brave
and strong hearts of free men."
None shall glance to the rear. None
shall yield a step. Each shall have
but one thought: to kill many until
they have had their fill.

This is why your general says to
you: You will break this assault and
it will be a happy day."

Gen. Henri Gouraud, author of the
above famous "kill many" order of
the world war and commander of the
Fourth army of French and Ameri-
can soldiers, including the Rainbow
division, arrives in Chicago this morn-
ing the guest of the 149th field artil-
lery, then colonel, now Brig. Gen.
Henry J. Reilly's regiment in the fa-
mous coast to coast division.

Medal for Davis.
He comes to present the medal of
the Legion of Honor to Brig. Gen.
Abel Davis, and to Louis J. Holmes,
first man of the 149th to be wounded,
losing a leg; and the Medaille Militaire
to Mr. and Mrs. A. Courtney Camp-
bell and Mr. and Mrs. Earl W. Spen-
cer, whose sons were killed in action
with the Lafayette escadrille.

Gen. Gouraud will be met at the
Union station where he arrives over
the Pennsylvania railroad from In-
dianapolis at 9:30 Chicago time, by a
large committee, chiefly of Rainbow
division officers who fought with him
in France. The delegation will in-
clude the former Secretary of War
Jacob M. Dickinson.

Gen. Gouraud will visit Mayor Leever
at the city hall early in the day.
Later he will visit the stock yards, the
National Guard, and the regular army
divisions. He will also visit the
Chambers of Commerce and the
Chambers of Industry.

Gen. Gouraud has been a soldier of
France since he was 20 years old. He
is remembered in the world war chiefly
for the famous "kill many" order
of the 149th field artillery, which he
issued on July 15, 1918, when the Germans
began their last great offensive on the
Champagne front.

He Salutes Chicago.
Col. Nobis E. Judah last night re-
ceived the following telegram from
Gen. Gouraud:

"Please convey to the people of
Illinois and Chicago through your gov-
ernor and mayor, the great pleasure it
will give me to visit Chicago, this
mighty city whose great bears the
name, 'I Will.' This motto is sig-
nificant to the world today. All
citizens are working to establish
solid commercial relations, to maintain
peace, which was established at a dear
price. They will succeed, and only by
cooperation can the peace of the world
be maintained. If France and America
together cry 'I Will,' the rest of the world
will pause, listen, and respond to the
appeal of this sister republic. I salute
Chicago."

**Doctors Said Diphtheria,
but Nail Killed Child**

South Bend, Ind., July 14.—(Spe-
cial.)—After two physicians had given
the cause of the death of
Helen Slauson, 9 months old daugh-
ter of Mr. and Mrs. Clarence Slauson
here today, an X-ray examination or-
dered by Coroner C. J. Crumpacker
revealed the fact that she had died
from the effects of a nail, one and
quarter inches in length, which was
found lodged in her throat.

**Irish Civic Guards Fight
Waterford Farm Workers**

—Week-end clashes between civic
guards and farm workers at Waterford
threatened today to develop into gen-
eral rioting. The guards charged the
mob with night clubs.

JOINS FASCISTI

**DICTATORSHIP OF
ITALY CLINCHED
FOR MUSSOLINI**

**Parliament Passes His
Vote Law; Sings.**
BY V. DE SANTO.
(Chicago Tribune Foreign News Service.)
(Copyright 1933: By The Chicago Tribune.)

ROME, July 15.—Premier Mussolini
scored one of the most brilliant tri-
umphs of his career when the
Italian parliament passed his
new electoral law at 11 o'clock to-
night by a vote of 393 to 149 amidst
scenes of wild enthusiasm. He was
also given a vote of confidence.

The new law, which practically
perpetuates the Fascist govern-
ment by permitting redistricting
and gerrymandering of election
districts, encountered the full oppo-
sition of such liberal elements as remain
in Italy, but the dictator imposed his
will.

A Strange Spectacle.
The Fascist dictator's power to
night is considered absolute.
The meeting of parliament presented
one of the strangest spectacles in his-
tory—twentieth century prime minis-
ter commanding a legislative body to
obey his order or cease to exist. Par-
liament obeyed, and the bill, which now
is law, precludes the possibility of the
Fascist being thrown out in any forth-
coming election.

Premier Mussolini, who personally
demanded passage of the election bill,
began by a stern renewal of his threat
to get rid of parliament altogether
unless it did his bidding. Later in
his speech the dictator took a low
autocratic tone. He appealed to the
patriotic sentiments of the deputies
and cited the achievements of the
Fascist party.

Demands Obedience.
The Fascist chieftain wound up
with a command to parliament to obey
him. When he stepped from the trib-
une frantic applause arose from every
part of the chamber, even from the
Socialists.

The vote was taken without further
debate.

After the vote, which was a severe
blow to the liberal elements, the de-
puties cheered the Fascist chieftain and
marched around the chamber singing
"Garibaldi's Hymn" and other na-
tional songs. They concluded with the
Fascist hymn, "Giovinezza."

Holds Up Gas Station.
Three colored men robbed Vernon Hay-
den, 4033 West avenue, manager of a Standard
oil filling station at 30th street and Hyde
avenue, of \$200 early yesterday.

ADRENALIN FAILS TO REVIVE YOUTH, LAGOON VICTIM

Three Saved as Canoe Tips Over Off Wilson.

Two injections of adrenalin were administered to a youth who was found dead in a canoe on Lake Michigan yesterday. The youth, who was 18 years old and a member of the Chicago Yacht Club, was found floating in the water near the Wilson Avenue bridge. He was taken to the hospital, but died before the adrenalin could take effect.

When the youth was found, he was in a state of unconsciousness. He had been in the canoe for some time, and the water was very cold. The youth was taken to the hospital, but died before the adrenalin could take effect.

Rescue Three Canoes. A search party was sent out to look for the youth's canoe. They found it in the water near the Wilson Avenue bridge. The youth was taken to the hospital, but died before the adrenalin could take effect.

Alertness of canoeists and life guards at Wilson Avenue beach early in the day saved the life of a young woman who was found in a canoe. She was taken to the hospital, but died before the adrenalin could take effect.

While changing places the boys accidentally tipped the canoe over. The youth was taken to the hospital, but died before the adrenalin could take effect.

Several thousand colored bathers at the East 38th street beach cheered when the youth was found. He was taken to the hospital, but died before the adrenalin could take effect.

Mr. Mary Nicholson, 1722 Cleveland Avenue, identified the body of a man taken from the lake near the Wilson Avenue bridge yesterday as being that of her son, Joseph Nicholson.

The body of Albert Wood, 464 Lake Park Avenue, with whom Nicholson was fishing on June 23 when they were both drowned, was found near Hamlet, Ind., last week.

Chlorine Dose Ready. Whatever small chance of health may exist to Chicago's countess thousands of beach fans is expected to be eliminated this week, when a system of purifying the water with liberal doses of chlorine will be put into effect.

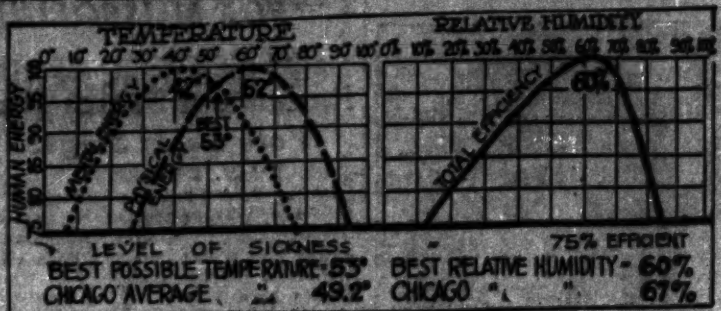

According to Eugene R. Pike, president of the Lincoln Park commission, arrangements are complete to begin injecting the chlorine in the shallow water near the lake shore in the vicinity of the principal beaches by the middle of the week. A test has been made on the Green Lake naval training station to be used in the work, and a sufficient amount of hose and other paraphernalia necessary are in readiness.

Bundless Events Plan. The idea of destroying any possible solution because of the ever-increasing congestion upon the beaches, originated with Health Commissioner Herman M. Bundless. Dr. Bundless hit upon the plan of using chlorine for this purpose, and in cooperation with John Erickson, city engineer, a plan of distributing the chemical was worked out.

"It is simply one of those 'safety first' measures," said Dr. Bundless. "Health conditions perhaps second to none in the world already exist upon Chicago's beaches."

Crowds Late in Day. The thousands usually characteristic of Sundays in July at the beaches did

WEATHER DIAGRAM

The diagram shows how different temperatures and moisture contents in the air affect human activity. These two together make climate. Chicago, in spite of its extreme, has nearly an ideal climate, weather records show.

LEGION NOTES

There will be a special meeting of the Legion post at the First Regiment armory tonight to arrange for celebrating the anniversary of the battle of Chippily ridge on Aug. 9 at the forest preserve.

not begin to make their appearance in force yesterday until late in the afternoon. But despite a summer drizzle earlier in the day, the lake shores were well filled with bathers.

When the sun finally made its appearance about 4 p. m., however, the big rush began. Before nightfall the beaches were crowded.

"These cloudy, cool Sundays in July always give me a good feeling," observed Harry J. Walker, superintendent of the 78th street beach. "You see, the rich folks can swim every day in the week if they want to. But Sunday's the main chance for the working guy and his girl. If they miss out on Sunday it spoils their whole week-end."

Several thousand colored bathers at the East 38th street beach cheered when the youth was found. He was taken to the hospital, but died before the adrenalin could take effect.

COURT'S RULING FAILS TO SAVE LIFE OF WOMAN

Memphis, Tenn., July 15.—C. C. Nichols, 47, a pharmacist, who on July 5 was served with papers in a divorce suit instituted by his wife and enjoined by the court from interfering with her during the pendency of the suit, shot and fatally wounded Mrs. Nichols in the lobby of a downtown business house, then killed himself with a shot through the head.

Mrs. Nichols, who was on her way to her place of employment when accosted by her husband, died several hours later in a local hospital.

The tragedy was similar to one which occurred here Monday when John Roe, young farmer of Humboldt, Tenn., killed his estranged wife, fatally wounding their infant daughter and then shot himself.

WHEN IT'S HOT YOU JUST CAN'T BE YOURSELF

Body Strikes as Mercury Rises, Maxwell Says.

BY SELBY MAXWELL.

How much does a hot day reduce human efficiency? When the mercury soars and the air feels sticky we with it. At such times sick folks grow sicker, diseases take a new hold, we all feel

cross and tired, with a weariness that no amount of resting will take out. Hot, and particularly hot wet air, suffocates as effectively as a feather pillow, though not so rapidly.

Scientific tests under a great many conditions indicate that by the time the thermometer reaches 77 degrees the average person has lost one-quarter of his mental energy. At 87 degrees he loses one-quarter of his physical energy.

low energy. Above these points both mental and physical energy decline rapidly. When the thermometer averages 85 per cent we can only be three-quarters efficient.

The Best Temperatures. Human beings are hardy and can endure almost anything for a while. But there are certain temperatures and moisture that we must keep to if we would be efficient. The best brain work is done when the average temperature of the body is 98.6 degrees. The humidity must be 60 per cent, on the average, for us to do our best. People seek cool drafts, electric fans, bathing in the lake—anything on a hot day to get these conditions.

Heat affects the lungs. These organs take oxygen out of the air and give it to the blood and in return absorb carbon dioxide and water vapor from the blood and return it to the air. Lungs exhale carbon dioxide best when the outside air is from 59 to 69 degrees cooler than the air inside the body.

Body temperature is 98 degrees. As the temperature on a hot day rises toward 96 the lungs will take up less and less of oxygen and give off less of the poisonous carbon dioxide. The result is a slow suffocation whose symptoms are drowsiness and lassitude.

Chilled Air Unhealthy. Many of the more modern buildings now use artificially cooled air. The thermometer in them may register twenty degrees cooler than outside, but the effect of such air is a cool chilliness, followed by mental dullness after being in it for a short while.

When rainy air is chilled the water content, or relative humidity, is raised. Human lungs require that the outside air be 40 per cent drier than the air inside the body. When the humidity is too high we, slowly, drown, for without carrying off its quota of water.

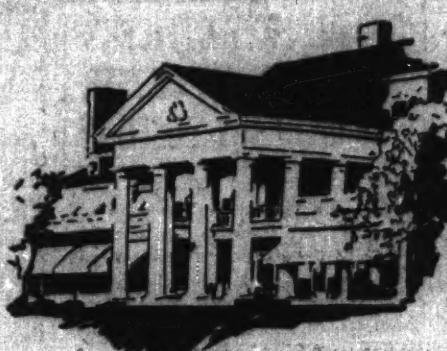

On days when both the thermometer and the hygrometer are high we suffer most, for then we both suffocate and strangle.

Layer Cake Poisons

4 Adults, 5 Children

Efforts of four physicians were necessary to save nine persons, including five children, who were stricken with ptomaine poisoning yesterday, supposedly from eating layer cake purchased in a bakery shop in South Wabash street. Police are searching for the owner of the bakery, said to be a stranger in the neighborhood. Samples of the cake were taken to the health department laboratory.

ONE BOY SUGGESTS. Chicago police have been asked to search for John Hoke, 15 years old, who disappeared from his home in Alton, Ill., about three weeks ago, and lately has been seen in Chicago.

At Midlothian's Derby for example—

Of the sixty-three cars parked at the Midlothian Country Club Golf Derby, twelve were Cadillacs—more than twice as many as any other car, regardless of price.

What is the deciding factor which leads so large a percentage of men who are successful in business and professional life to select Cadillac as typifying all that a fine car should be?

It is preponderance of value which appeals to the analytical minds of these men. Many of them could easily pay a great deal more for an automobile. They buy Cadillac because, after mature reflection, they have a clear conviction that it is the world's greatest motor car value.

FEET HURT?

Do you know any person among your acquaintances who has feet exactly like yours? Can you wear your father's, your mother's, your sister's or your brother's shoes and enjoy real foot comfort? Of course you can't. Your right foot is different from your left. You know your feet are different from those of other people, but you will insist on forcing your feet into shoes that are made over stick heels from measurements of some other person's feet and then wonder why your feet are so fatigued, your ankles are weak, your arches broken, why you have corns, blisters, bunions and sore and tender feet. Minding shoes are the cause of your troubles. Stop wearing them shoes today and consult me at once. I will build a happy home for your feet in the form of a pair of

ANTI-AIRCRAFT GUN SENDS SHELL UP 45,000 FEET

U. S. Developing Titan Death Rockets.

Washington, D. C., July 15.—The development of anti-aircraft weapons has been satisfactory, in the opinion of American military experts, who have been studying the results of the fact that airplanes have been shot down in future from the clouds against hostile aircraft.

War college umpires, after careful consideration of all elements in the game, were compelled to award victory to the enemy air fleet because of the lack of fighting planes to protect the defending bombing squadrons.

It was held that the bombers were clearly have been brought down down off by the enemy combat planes at the umpire's ruling that the attacking had been accomplished.

The result conformed with the expectations of army officers who had studied out the probabilities of future aerial and land engagements. The game, however, was not a test to serve as any test of the value of types of land defenses against a craft developed since the war to present fighting air squadrons in position of cities or camps against bombers.

New Anti-Aircraft Guns. Recent war department memorandum described five new types of anti-aircraft guns now in progress of development and also a new variety of enormous power to be used in the same purpose.

The first of the new guns is the other machine gun with a horizontal range of about 27,000 feet and a slight range of 2,000 to 12,000 feet at a rate of fire of about 600 shots a minute. Fire control is maintained with this gun through new ammunition, visible night or day to 500 yards.

A 50 caliber gun is under manufacture for issue as a substitute for the 30 caliber weapon now used, which is of war days.

Two Shots a Second. A second gun under development is a 37 mm. machine gun, firing five shots a minute, with a range of 27,000 feet and a slight range of 2,000 to 12,000 feet at a rate of fire of about 600 shots a minute.

It is planned to install these weapons on batteries of four operating with a telescopic sight control and to be fired and aimed by a single gunner. The result will be a secondary battery to keep hostile craft at bay and to destroy them as they approach.

Fire Shell 21,000 Feet Up. A third new gun in the group is a 37 mm. machine gun, firing five shots a minute, with a range of 27,000 feet and a slight range of 2,000 to 12,000 feet at a rate of fire of about 600 shots a minute.

It is planned to install these weapons on batteries of four operating with a telescopic sight control and to be fired and aimed by a single gunner. The result will be a secondary battery to keep hostile craft at bay and to destroy them as they approach.

Fire Shell 21,000 Feet Up. A third new gun in the group is a 37 mm. machine gun, firing five shots a minute, with a range of 27,000 feet and a slight range of 2,000 to 12,000 feet at a rate of fire of about 600 shots a minute.

ANTI-AIRCRAFT GUN SENDS SHELL UP 45,000 FEET

U. S. Developing Titanic Death Rockets.

Washington, D. C., July 15.—While development of anti-aircraft weapons has been satisfactory, in the opinion of American military experts, the fact that airplanes themselves will in future form the chief defense against hostile aircraft. War college umpires, after careful consideration of all elements in the game, were compelled to award victory to the enemy air fleet because of the lack of fighting planes to protect the defending bombing squadrons. It was held that the bombers would certainly have been brought down or driven off by the enemy combat planes at the umpire's ruling that the enemy side had been accomplished.

This result conformed with the expectations of army officers who have fitted out the possibilities of future air and land engagements. The game, however, was not of a nature to serve as any test of the various types of land defenses against air attack developed since the war to prevent fighting air squadrons in protection of cities or camps against hostile bombers.

New Anti-Aircraft Guns.
Recent war department memorandum described five new types of anti-aircraft guns now in progress of development and also a new searchlight of enormous power to be used for the same purpose.

The first of the new guns is the 60 caliber machine gun with a horizontal range of about 27,000 feet and a height of range of 9,000 to 12,000 feet at a rate of fire of about 500 shots a minute. Fire control is maintained on this gun through new tracer ammunition, visible night or day up to 600 yards.

The 50 caliber gun is under manufacture for issue as a substitute for 1918 caliber weapons now used, which is of little use in war days.

Two Shots a Second.
The second gun under development is a 37 mm. machine gun, with a high velocity shell with fuses so delicately adjusted that the shell, while safe to handle before firing, explodes on contact with balloon fabric once they have been discharged from the gun.

Rate of fire of 100 to 150 shots a minute is expected with this weapon, which will have a range of 21,000 feet and a height of range of 10,000 to 15,000 feet, making possible accurate shooting up to 1000 feet in any direction. It is planned to install these weapons in batteries of four operating with a single telescope sight control and to be fired by a single gunner. The result will be a secondary battery of two weapons to be used above the 1000 level and the "27s" will be a highly mobile equipment fast in getting into action.

Miss Shell 21,000 Feet Up.
The third new gun in the group is a 37 mm. machine gun, with a high velocity shell with fuses so delicately adjusted that the shell, while safe to handle before firing, explodes on contact with balloon fabric once they have been discharged from the gun.

Rate of fire of 100 to 150 shots a minute is expected with this weapon, which will have a range of 21,000 feet and a height of range of 10,000 to 15,000 feet, making possible accurate shooting up to 1000 feet in any direction. It is planned to install these weapons in batteries of four operating with a single telescope sight control and to be fired by a single gunner. The result will be a secondary battery of two weapons to be used above the 1000 level and the "27s" will be a highly mobile equipment fast in getting into action.

Try Indirect Firing.
The fourth new gun in the group is a 37 mm. machine gun, with a high velocity shell with fuses so delicately adjusted that the shell, while safe to handle before firing, explodes on contact with balloon fabric once they have been discharged from the gun.

Rate of fire of 100 to 150 shots a minute is expected with this weapon, which will have a range of 21,000 feet and a height of range of 10,000 to 15,000 feet, making possible accurate shooting up to 1000 feet in any direction. It is planned to install these weapons in batteries of four operating with a single telescope sight control and to be fired by a single gunner. The result will be a secondary battery of two weapons to be used above the 1000 level and the "27s" will be a highly mobile equipment fast in getting into action.

Try Indirect Firing.
The fourth new gun in the group is a 37 mm. machine gun, with a high velocity shell with fuses so delicately adjusted that the shell, while safe to handle before firing, explodes on contact with balloon fabric once they have been discharged from the gun.

Rate of fire of 100 to 150 shots a minute is expected with this weapon, which will have a range of 21,000 feet and a height of range of 10,000 to 15,000 feet, making possible accurate shooting up to 1000 feet in any direction. It is planned to install these weapons in batteries of four operating with a single telescope sight control and to be fired by a single gunner. THE SPEED HARVEST

(Copyright, 1923, by The Chicago Tribune.)

Illustration of a person harvesting wheat with a scythe, symbolizing the speed of the harvest.

U. S. LEADS WORLD IN USE OF DOPE, BUNDESEN SAYS

Forty times as much of habit-forming drugs are consumed in America per capita as are consumed in any other of the white nations.

The use of these drugs in the United States has trebled in the last two years and as a people America is now using seventeen times as much opium per capita as the Chinese.

These two statements are quoted by Health Commissioner Bundesen in an appeal to the people of Chicago to join the fight on the growing evil.

According to Frederick A. Wallis, commissioner of correction for New York City, the amount of opium used per capita by the leading nations of the world is as follows: Italy, 1 grain; Germany, 5 grains; England, 5 grains; France, 4 grains; and America, which does not grow the commercial poppy plant at all, 26 grains.

ons, the experts are working out a system of indirect aiming for all of them, experiments having shown that central station control firing is greatly superior to the old wartime systems. Two types of central stations are under development, "either" of which will obviate the necessity for altimeter stations and base line readings and materially speed up aiming and firing, although requiring less personnel in operation than the old control methods.

POPE TO MOVE TO VIENNA, SWISS PAPERS REPORT

BY RAYMOND FENDRICK.

(Chicago Tribune Foreign News Service.)

LAUSANNE, July 15.—Is Pope Pius XI planning to move from Rome, the Holy City, to Vienna?

Swiss papers, which keep their ears close to the ground, began today to give some credence to this rumor.

"The Vatican undoubtedly is working to establish the papal states," is the substance of their reasoning.

"The collapse of Germany is going to wreck the illogical structure which the Versailles treaty set up in central Europe, and amidst this wreckage the Vatican will find an opportunity to create a group of papal states around Vienna—notably Austria, Po-

land, and Bavaria, and possibly Czechoslovakia.

A Prisoner in Rome.
In this bigger role the pope will find Vienna a better headquarters. Besides, he is kept too much a prisoner in Rome.

"The College of Cardinals, which is the senate of the Roman Catholic church, sincerely believes that now that the powers have failed to restore order and peace, the pope's last hope to add the world is in this direction. They believe the pope can only make peace by establishing papal states in central Europe to replace the present states."

Seipel Paves the Way.
Chancellor Mgr. Seipel of Austria already is clearing the ground for this new order of things.

Swiss opinion holds that the pope would willingly abandon Rome and all its historic associations and church buildings for the privilege of again establishing some papal states. Besides, the real freedom the pope would have in Vienna would be of priceless benefit to the church.

Death of Boy Found in River Called Accident
Walter and William Jedynak, 5 and 4 years old, 1829 Lincoln street, who were arrested and questioned in the death of Robert Laban, 8, 1333 Cortland street, whose body was found in the Chicago river near his home, were released yesterday. Police said young Laban was trying to catch minnows and lost his balance. He had been missing from his home for two days when his body was found in the river.

HARDING CAMPS ON 'VOLCANO' OF ALASKA'S WOES

At Fairbanks, Center of
Railroad War.

(Continued from first page)

The Copper River and Northwestern railroad running into the interior from the ocean gateway at Sitka, which is a twelve-hour car run from Seattle.

Believe it or not, when the government determined to complete the railroad project to Fairbanks, the Guggenheims, through John, unloaded the unsuccessful Alaska Northern, then losing money, and retained the profitable Copper River line. It is charged further that since the government spent \$35,000,000 in completing the standard gauge line of 487 miles from Seattle to Fairbanks, the Guggenheims would have done everything possible to obstruct its success and to retard the development of the country through which it extends.

Uncle Sam Robbing Himself.

which Hoover proposes sitting to the bottom is that the Morgan-Guggenheim line, the Alaska Steamship company, obtained a highly preferential contract by which the great bulk of the freight coming down from Fairbanks is transported by water over the Alaska Steamship line from Anchorage instead of the ocean terminus of the government railroad at Seward. The government thus is placed in a position, it is alleged, of making badly needed revenues from the coffers of its own railroad in order to enrich the Guggenheim lines. The contract is said to be so much to improve influence as to yielding by government officials to the contagion of Anchorage in its determination to make itself the capital of Alaska and the territory's political, economic, and social center.

Anchorage managed through some method to have the general land office removed from Juneau to Anchorage, resulting in a Juneau hotel which was audited from the Arctic circle to Puget sound. Guggenheim influences are credited with that removal as a part of their general scheme to boom Anchorage as the chief port and capital.

Day of Marvelous Society.

The presidential party had as a preliminary to its official troubles here the most delightful day of travel yet experienced. The trip, consisting of 114 miles over the Alaska railroad from Seward to Anchorage was through scenery hardly equaled anywhere. Mr. and Mrs. Harding and other members of the party who have toured the world exhausted their superlatives over the grandeur and beauty of the panorama between Hoonah bay and the head of Cook inlet, for miles along Turnagain arm, a branch of Cook inlet, where is a forty-five foot tide, next to the Bay of Fundy the heaviest tide in the world, is spread out before the eye.

picture of the Creator's art, in which snow-capped mountains, gigantic glaciers, forests of spruce and hemlock, landlocked lakes of sparkling brilliancy compete with the turbulent, blue-tinted inland waters of the Pacific for holding the attention. Then there were the falls of Lacey Tracey leaping glacial rivers, all crowned by a rainbow sunset which embellished the heavens for many hours, with Mount McKinley, 12,000 miles away, looming in the background like a hall of fire.

At Anchorage at 10 o'clock at night, an enthusiastic crowd of men, women, and children gave a patriotic welcome to the executive.

Under the spell of a glistering midnight sunset, the President described the day's experience and how much rounding the world to share.

"If the people of the world only realized what a gorgeous picture is here," said Gov. Rogers, "tourists from all lands would come to a constant procession."

The presidential party set out from Seward in a modern train of Pullman, dining and observation cars, in comfortable as anywhere in the world. The route was over a sparkling turquoise in white and green mountain setting, and thence down a gorge, where, has been erected a remarkable engineering monument to man's ingenuity.

Pass of Engineering.

In descending the second summit of the range, the winding, looping railroad revealed a strange spectacle. Within the gap are tunnels, and a series of great heights, snow-capped, looms with the track at one point crossing directly over another stretch of miles track. Within the gap also is the famous Bartlett glacier, where the party stopped to observe a following train. This morning round the party at Chitochan, where the President's

spotted the navy anthracite coal mines on which over a million dollars were expended before they were closed a year ago by the anthracite strike. Then the party proceeded onward toward America's plateau, Mount McKinley, with Fairbanks and the end of the railroad in prospect.

FATALITY HUNT BY RAIL.
Harvard Hamper, 19 years old, 3041 South Winchester avenue, was fatally injured yesterday when he fell from a train in the Haven Road company plant at 10th and Jackson streets.

Sheriff's Sister Pursues, Captures Fleeing Prisoner

Fairbanks, Ark., July 15.—Gena Barber, sister of Sheriff E. E. Barber of Miller county, using one of the sheriff's big six guns, today ran down and captured W. M. Beard, a fugitive prisoner, who was attempting to make his escape from the county jail here. Miss Barber commanded a passing automobile and caught Beard crawling under a box car in a lumber yard.

BLUE BOAR English Blend Cigarettes

A New Cigarette —a new blend

A 19 year development resulting in a remarkable discovery.
A rare delight for critical smokers. Now on sale everywhere.

At a time when cigarettes have apparently reached their limit of perfection comes a surprising discovery, a new-type cigarette, very distinctive.

As all men know, wonderful progress has been made in cigarette making. There are many excellent brands, many favorites. Blending has reached an art.

To the credit, yet despair of experts, no outstanding achievement has seemed possible lately. Each smoker has become content with his favorite cigarette—and no one has been expecting an entirely different, unusual blend.

But suddenly out of perfection, as a 19 year recompense, comes a wonder-blend, exclusive, superfine.

Its pedigree

We call this new cigarette Blue Boar because it is developed from America's favorite fine tobacco, Blue Boar Pipe Mixture.

For 19 years its tobacco have been the finest obtainable—eight rare types of the choicest American, Turkish and Egyptian. Here was no chance for betterment.

The secret of this new-type cigarette is in a newly discovered method of blending. This may sound commonplace to men who have felt that the limit of refinement had been reached, but you will be as surprised as others when you smoke your first pack of Blue Boars.

Blue Boar tobacco is TRIPPLY blended.

The ordinary process is but a single blending, which now seems crude. Yet for years experts have considered one blending sufficient, and have searched elsewhere for refinements.

In Blue Boar we blend the two American tobaccos separately. Likewise the five Turkish. Then we give the Latakia from Egypt a mellowing treatment. Each tobacco develops its finest characteristics. A third and final blending insures a rare and distinctive combination, such as you've never known before. The old way never could bring such perfection.

It is a costlier, slower process—but worth it as you'll agree. The result of this simple discovery makes all the difference in the world—an entirely new taste, a refinement of all refinements.

Your decision, please

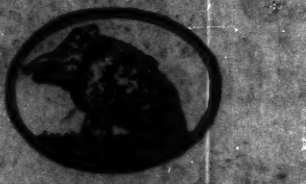

Blue Boar Cigarettes are now on the market and already over 500,000 men have shown this triple blending their enthusiastic preference.

We ask you to sample this unusual cigarette. Learn why it is causing so much comment. Note its distinct flavor, its surprising and agreeable difference from any cigarette you have ever smoked before. Compare triple blending with the ordinary.

Buy one pack of Blue Boars. We promise you a delightful surprise. You'll undoubtedly adopt Blue Boars as your final-type favorite—and never switch again.

RADICALS AIDED BY C. O. P. LOSSES IN U. S. CONGRESS

Control of Committees Is
Expected to Change.

BY A STAFF CORRESPONDENT.
Washington, D. C., July 15.—(Special.)—Deaths of two members of Congress during the past week have increased the possibility that the radicals in the next session will be able to place themselves in a position to influence committee action on tax legislation.

The death of Senator Dillingham (Rep., Vt.) leaves another Republican vacancy on the senate finance committee which handles legislation relating to taxes, the tariff, soldiers' bonus, foreign debt, and other matters affecting the revenue.

The death of Representative Mott (Rep., N. Y.) similarly makes another Republican vacancy on the house ways and means committee, which is in charge of the main classes of legislation. So many vacancies now exist on both committees that the radicals Republicans consider themselves in a

RADICALS AIDED BY G. O. P. LOSSES IN U. S. CONGRESS

Control of Committees Is
Expected to Change.

(BY A STAFF CORRESPONDENT.)
Washington, D. C., July 15.—(Special.)—Deaths of two members of congress during the past week have increased the possibility that the radicals in the next session will be able to place themselves in a position to influence committee action on tax legislation.

The death of Senator Dillingham (Rep., N. Y.) leaves another Republican vacancy on the senate finance committee which handles legislation relating to the tariff, soldiers' bonus, foreign aid, and other matters affecting revenues.

The death of Representative Mott (Rep., N. Y.) similarly makes another vacancy on the house ways and means committee, which is in charge of the same classes of legislation. So many vacancies now exist on both committees that the radical Republicans consider themselves in a

RAIL PROSPERITY PASSES BY WEST, FELTON ASSERTS

Because they have not shared the prosperity of eastern and southern roads, western railroads can bear no further reduction in freight rates, according to a statement issued last night by Samuel M. Felton, president of the Chicago and Great Western railway and chairman of the western railway ways committee on public relations.

Competition of the Panama canal and freight rate reductions averaging 16 per cent since 1921 are responsible for the unsatisfactory showing, Mr. Felton indicated.

strategic position whereby they can force the party leaders of the senate and house to give them greatly increased representation.

The conservative Republicans are admittedly worried over the situation. While the conservatives will be able to retain a majority of the Republican places on each of the committees, they

realize that by giving the radicals even two or three places on each committee it will be possible for the radical Republicans and the Democrats to control committee action.

Five Republicans who were members of the senate finance committee in the last session are no longer in congress. The place of former Senator Calder was filled at the end of the last session by the appointment of Senator Reed (Pa.), a conservative Republican.

Expect Radical Demands.

The radical Republicans expect to demand the placing of a middle western radical on the committee from the section represented by former Senator McCumber. Senator Brookhart (Ia.) is one of the possibilities in this connection. The radicals also are likely to demand another place for the west on the theory that the east has had more than its share of places on the finance committee.

In the last congress the finance committee was made up of ten Republicans and six Democrats. On this basis, three radical Republicans combining with six Democrats could control this committee.

With the death of Representative Mott there are now five Republican vacancies on the house ways and means committee. This committee has been made up of ten Republicans and eight Democrats, but in the probable reappointment the basis may be changed to fifteen Republicans and ten Democrats.

BOMB CAUSES \$100 LOSS.
A small black powder bomb, which exploded in the hallway of a building at 1119 Cambridge avenue, leased by John Desiderio, caused damage amounting to \$100 early yesterday.

HARDING WRONG ON WORLD COURT, SAYS H. FISH JR.

(Chicago Tribune Foreign News Service.)

LAUSANNE, July 15.—"President Harding's world court proposal is a

false alarm," said Representative Hamilton Fish Jr., who has just arrived here after studying the workings of the court at The Hague and the relations of the court and the league of nations at Geneva.

"President Harding promised the American people a solution for the peace problem, and he has offered them a stone. The court has no more power to prevent war or bring about peaceful relations than the man in the moon. It is a mockery of justice to attempt to deceive the people by holding out assurances of the court's power to enforce peace."

"The United States would do well to keep out of the European mess until there is a moratorium in hatred and a sincere desire for peaceful relations among themselves."

Mr. Fish added that America could not consider joining the league, holding that it was largely an instrument to enforce the Versailles treaty.

Bring in Biggest Oil Gusher on Signal Hill

Long Beach, Cal., July 14.—What was said to be the largest oil gusher in the history of southern California fields was brought in today in the Signal Hill district. The initial flow was variously estimated at between 25,000 and 32,000 barrels a day. The well, known as Mile Mile No. 4, was brought in at 4,000 feet and the oil tested 25 gravity.

Balaban & Katz Theatres

Are delightful vacation
spots for the youngsters

Right now, when humanity everywhere is suffering the usual discomforts of Summer heat, Balaban & Katz theatres, because of their massive, electrical refrigerating plants, are at the very height of their business.

It seems like an extravagant statement to make because it is so unusual. It is a condition which exists nowhere else in the world.

Perhaps this large Summer attendance is due in large part to the children. Thousands of parents bring them here to afford them the delights of good pictures and healthful surroundings. Thousands of mothers send their children unattended, because they know the excellent care they get and because they know that the children are far better off here than in the hot, dusty streets.

Balaban & Katz want the little ones. They are welcome guests, and we have established a special admission price for them. To make them happy while they are at our theatres we have carefully instructed our ushers to treat them with the utmost courtesy, to find them the best available seats, and to keep them together when they come in groups.

These visits are important and long-remembered events in the lives of the kiddies. They are veritable vacations. The good, pure air refreshes their minds, and invigorates their bodies, and the good music inspires them. They can't help being benefited in many ways.

We feel a keen sense of responsibility when they come unchaperoned, and making them comfortable is a distinct pleasure to us.

BESIDES—the children of today are the grown-ups of tomorrow.

LA FOLLETTE RAIL DEMANDS AFFECT EXCESS EARNING

Court Complications Seen as Result.

TRY A STAFF CORRESPONDENT.
Washington, D. C., July 15.—(Special.)—Demand of the La Follette national conference on railroad valuation that the interstate commerce commission make an estimate of the original cost to the public of the railroads on the basis of present investment may have far-reaching effect not only on the railroad industry but also on the recovery of earnings by railroads in excess of 6 per cent on the value of the individual properties.

Under the rate-making provisions of the transportation act the railroads are required to pay to the interstate commerce commission one-half of the excess earnings of the carriers, for those excess earnings have been figured on the basis of a reserve fund.

The railroads have paid to the commission approximately \$100,000,000. Complications of the returns on earnings for the year 1922, just completed by the commission, indicate that the railroads admit an excess of \$1,000,000,000 for that year.

Payments Under Protest.
Most of the payments made up to this time have been made under protest, the carriers contending that the part of the law relating to recovery of excess earnings is unconstitutional.

Before the commission, itself, can figure what a particular railroad owes the government in excess earnings it must put a value on the property. The commission has never issued a formal order demanding payment by a carrier of a specified sum, nor has it accepted as final the admitted excess of earnings of the carriers, for those excess earnings have been figured on the basis of what the carrier says its property is worth.

Will Mean Court Action.
Refusal of the commission to grant the petition of the La Follette conference, which asks that all valuation proceedings be recommitted to the commission's bureau of valuation and a new start made with reference to the reporting and accounting of original cost to date, will mean the institution of a mandamus suit by counsel for the conference against the commission.

With the unsettled state of the valuation proceedings because of the attack of the La Follette conference and also because the excess earnings provisions are also under attack, definite action looking toward recovery of excess earnings is not looked for in the near future.

Oil Station Robbed of \$100.
A man believed to be a former convict entered the Standard Oil station at Milwaukee and Wisconsin and stole \$100 from the safe.

Y. M. C. A. Worker Dies

WILBUR MESSER, WORLD LEADER IN Y. M. C. A. IS DEAD

L. Wilbur Messer, LL. D., internationally known as a leader in the work of the Young Men's Christian association, for thirty-five years the general secretary of the Chicago Y. M. C. A., died yesterday at the Presbyterian hospital after an illness which kept him unconscious since March 26.

Funeral services will be held at the Hyde Park Methodist Episcopal church, of which Mr. Messer was a member, at 2 o'clock Wednesday. Burial will be at Lincoln, Ill. He is survived by his wife and a daughter, Mrs. Virgil D. Earl of Astoria, Ore.

Dr. Messer was born in 1856 at Somersworth, N. H. His first secretaryship of the Y. M. C. A. was at Peoria, Ill. From there he went to Cambridge, Mass., where he served four years, coming to Chicago in 1891. On Jan. 11 Dr. Messer resigned as a general secretary and retained as a member of the executive body. On March 9 he collapsed in his room at the University club and was taken to the Presbyterian hospital.

When Dr. Messer came to Chicago the Y. M. C. A. was located in Farwell hall, on Madison, near La Salle street, and in four small but well placed buildings for railroad men. He led in the construction of the present Association building at 19 South La Salle street and in the expansion of the work of the Y. M. C. A. until it now has assets of more than \$4,500,000, including the Y. M. C. A. hotel on South Wabash avenue.

Get Rid of Your Callouses
Many thought it could not be done, but through using the New Post System we are able to give permanent relief to 97 out of every 100 patients.

Explanation
Like the hands of the carman, calloused to protect the bone structure of overworked hands, foot callouses are nature's way of protecting the foot from the jar and strain of traveling on broken arches. The only way to get rid of them is to get rid of the cause. We do it by the Post System—readjusting misplaced bones by this special method.

Our Method
We know the exact location of each bone and ligament. We will replace them with our hands, and then Nature will keep them in place, after a surprisingly few treatments. BRACES AND SUPPORTS ARE DISCARDED because Nature restores the foot to normal and normally no braces are needed. You cannot determine this condition with your eye. If your foot are sore and tire easily, then you need attention.

Foot Examination Free
We charge you nothing for an examination. After we look at your feet we will give you a close estimate of the cost of giving you PERMANENT RELIEF. This is not an experiment with us. Your foot troubles are over forever if you write, phone or call.

HOOVER PRAISES TRADE BODIES AS AID TO BUSINESS

Says Statistics Keep Industry Normal.

Washington, D. C., July 15.—Trade association activities as a whole have served constructive purposes in the commercial history of the United States, Secretary Hoover declares in a statement attached as a preface to a volume of information on the subject just issued by the commerce department. In the preparation and circulation of statistics of production and consumption, in the direct dealing with congress and legislative bodies and in contact with labor problems, he asserted, the associations, with some exceptions, have been of general service.

"There is no question," Mr. Hoover said, "but that the curves in the business cycle from activity to depression have been less disastrous in those industries or trades where accurate, lawful statistical data have been available to all."

Business Must Be Informed.
Fundamentally, it is impossible for business men to form those vital judgments as to their future course of action in the wise and safe direction of their activities unless they are informed as to the changing currents of production and consumption, not only in their own line but also in other lines of business, which indicate broader currents of economic life.

"The only criteria are statistics and if industry is to match with reasonable profits instead of undergoing fits of famine and feast, if employment is to be held constant and not subjected to vast waves of hardship, there must be adequate statistical service."

Legislative Activities.
Discussing legislative activities, Mr. Hoover asserts that "the interest of any one industry or trade, to be sound in the ultimate analysis, must be the public interest and in their legislative activities many trade associations have borne this action foremost."

"The demand of legislatures for the views of the different trades upon all sorts of questions of public interest."

Miss Mary Crowe, 28 Years School Teacher, Is Dead

Miss Mary A. Crowe of 4466 Berkeley avenue, for twenty-eight years a teacher in the public schools, died yesterday. Miss Crowe, when she resigned some years ago, was assistant principal of the Raymond school, and did a great deal of work for the Red Cross during the war. It was this work that brought on the illness that eventually caused her death. Funeral services will be held at 2:30 p. m. on Wednesday at St. Ambrose Catholic church, 425 West Lawrence avenue.

NEW TYPE MOTOR BUS IS PUT IN SERVICE TODAY

Owners Expect It to Win Great Favor.

Three buses designed especially for Chicago traffic will be placed in service today on the north side by the Chicago Motor Coach company, officials announced yesterday. Hailed as the most practical and beautiful motor coaches ever made, they are expected to command immediate popularity.

The coaches are attractive in appearance with good lines and balance, and are equipped with many "extras." The engine is located down to the rear, a three speed silent transmission is furnished for use in Chicago where grades are few.

Three sets of brakes, ample provision has been made for safety. The buses have three sets of lights, 300 operating lights, the front coach has one upon the front. Rubber shock absorbers and progressive type springs assure the rider's comfort.

The new coaches, it is announced, will accommodate twenty-eight passengers and thirty-five on the upper deck. All of the seats face forward except a single seat at the head of the coach.

Lighting is provided for by a winch more than half the width of the coach in addition to windows on the side with light brass shades replacing the old heavy wooden ones.

The new coaches are the first of a complement of 600 designed for service in Chicago.

Traction Wage Arbiters Resume Sessions Today

Sessions of the board named to arbitrate the traction wage dispute will be resumed in the city hall council chamber today. All testimony will be completed by Wednesday or Thursday, it is said, and an award probably will be forthcoming before the end of the week.

WATKINSON FOUND DEAD

John Davis, 55 years old, 848 West Madison street, a workman, was found dead, apparently from heart disease, in an alley at Halsted street and Third avenue yesterday.

2 FLYERS DROWN IN PACIFIC OCEAN

Venice, Cal., July 15.—Herbert Wilson and Cecil Costas, aviators, were drowned in the ocean here today when their engine failed at an altitude of about 500 feet and their airplane glided into the water.

Volume Sales Cut Selling Cost!

Volume Production calls for Volume Selling. Sales to more retailers, of course. But basically, Volume Selling is more and bigger sales to each retailer. How? By supplying each retailer with more customers asking for your goods, and accepting them when offered.

Haranguing and "gingering up" salesmen helps some. But giving them a Plan—a Method—enabling them to make a proposal to retailers to move goods—helps more. A modern selling factor that helps salesmen get volume and, thus, reduce selling cost, is Advertising, when properly applied.

For 19 years this thoroughly equipped advertising agency organization has specialized in Merchandising. For this is the application of advertising to the economical marketing of goods. Throughout that time we have been allied with many of the world's largest concerns. The experience thus gained makes our service distinctive and peculiarly valuable.

CHICAGO NEWSIES PLAN FOR FIRST ANNUAL PICNIC

The date for the first annual picnic of newsboys has been announced for Sept. 1. It will be held at Grant's park.

Every newsboy you hear on the streets or see delivering your "satire" in times of excitement and stress will be there. The festivities will be opened by County Treasurer Carr, who was once a newsboy, and there will be a parade around the loop preceding the picnic.

Max Annenberg of The Tribune, J. N. Eisenberg of the Chicago Evening American, Fred Reinhardt of the Chicago Evening Post, Ben Anderson of the Journal, George Baker of the Daily News, and James Hagan of the Herald and Examiner will make up the reception committee.

Chief Silvermaster, the Indian tenor, is another attraction who will appear at the Midway Dancing Gardens. Tansy, a benefit for the Free Ice fund and Camp Algonquin, will run on Monday night, July 16.

It is estimated that at least 5,000 couples may dance at one time without crowding in the outdoor dancing gardens, while there are spacious ballrooms for those who wish to eat or stroll or be served with refreshments and watch the vaudeville attractions.

There are equally spacious indoor ballrooms in case the weather does not permit playing outdoors.

2 FLYERS DROWN IN PACIFIC OCEAN

Venice, Cal., July 15.—Herbert Wilson and Cecil Costas, aviators, were drowned in the ocean here today when their engine failed at an altitude of about 500 feet and their airplane glided into the water.

MARSHALL FIELD & COMPANY

MANUFACTURERS - IMPORTERS - WHOLESALE - RETAILERS

In all shades except grey and white

First Floor, North, Day

Field Hudson Seal Custom Built Coats

A Recent and Remarkable Achievement In the Creation of Fine Merchandise

FIELD Hudson Seal Custom Built Coats are made of dyed musquash skins selected from thousands of pelts for their beauty of texture, their size and their perfection. They are the product of our Fur Workrooms, having been developed during the past year, after much careful experimentation.

Not less admirable than the quality of the skins themselves is the character of every phase of the workmanship put into them. They are constructed with a thoroughness very rarely found, which differs in many ways from the usual mode of manufacture. The finish of every seam, the meticulous reinforcement, the unusually fine interlinings are all part of the striving for quality which has actuated production of these "Field Seal" Coats.

They are styled authentically, and, since they are custom made, will always represent the most recent tendencies of the mode.

Custom Fur—Stock Floor, North, Week

Chiffon Frocks For Summer Dances

Display A High Brilliancy Of Color, \$45, \$55, and \$65

OFTEN the success and glory of a whole summer hangs upon the particular hue of the frock you may wear for dancing. This group of Frocks with their simple formality, besides being delightfully original as to small details, such as the harmonious hue of the girdles and the uneven petal skirts—is distinguished by the almost ethereal shades of chiffon combined in each style.

In the selection, there are pale lemon yellows, vivid orange, cool faint green, and apricot that blends softly into a delicate rose. The selection of such a Dress is a positive pleasure and the value, because of their quality, finish, and loveliness of color, is out of the ordinary.

Stock Floor, South, Week

A Clearance of Hats - \$10, \$12 and \$15

From Our French and Debutante Salons

OUR French and Debutante Salons offer a selection of Summer Hats at greatly reduced prices, and the woman of discriminative taste will find this clearance very worth her while. The quality and workmanship of these models are assured. They are individual in style and very unusual at such low prices.

French and Debutante Salons—2-118 First, North, Day

Where you find the value in summer clothes

It's not in the price alone; it's in the fine fabrics and tailoring that make the clothes wear and stay stylish. Our store is full of extra value like that

Dixie Weaves; gabardines; silk suits; mohairs; crushes \$30

Maurice L. Rothschild

PRESENT BLUE SKY LAW EVADED BY BUCKETEERS

State Control of Brokers Urged as Remedy.

BY DONALD EWING.

Ignorance of the law on the part of the average citizen and the fact that while Illinois statutes covering bucketeers are fairly strong, there is a widespread weakness in enforcement provisions, are the legal loopholes through which fly-by-night brokers drag their buckets in, scooping up approximately \$40,000,000 a year in false stock deals in the Chicago district.

That is the consensus of leading legitimate brokers and state officials in considering what can be done to keep "bucketeers" out of Chicago after they have at least been temporarily dislodged from their meetings through the present action. Some even voice the less majestic that weakness in enforcement provisions actually has made the present blue sky law an asset to some fraudulent stock dealers.

Bucketeer Finds Flaws.
The securities act of Illinois, designed to block the dealer in wildcat stocks, has been fairly successful, authorities agree, but the bucketeer, with his business developed to a fine art, has found little to obstruct his method of swindling the uninformed " sucker."

State control of brokerage houses is the solution advanced most frequently when recognized stock exchange members and state officials are asked what can be done to block the legal loopholes of the present laws. The present blue sky law provides that no stock can be sold in Illinois unless it is qualified by the secretary of state or is exempt from qualification through being listed on the New York, Chicago, or Boston exchanges.

Four Classes of Stocks.
One of the big catches of the law is that the average citizen is unaware that there are four classifications of stocks and that the stock salesman simply tells his prospect that the security is "qualified," giving the impression that the state thus has officially approved it.

Classification "A" covers stocks which inherently are at regardless of what may happen, such as government bonds, national bank issues and other guaranteed outputs.

Classification "B" covers issues which are standard through the method of transaction, such as capital stock distributed among the shareholders in the company without incurring any extra liability or expense.

Classification "C" covers stocks of companies which have been in business at least two years and consequently can show definite earnings or losses.

Classification "D" is the stock handled mostly by the bucketeers. It is purely speculative—no earnings, and no interest—chance projects legally promoted.

Full to Mention.
The law provides that all circulators dealing with "D" stock must state that it is class "D," speculative, and that the state in no way stands back of it. But the "bird dog" stock salesman simply tells his prospect the stock is qualified under the blue sky law, without qualifying it is class "D," thus giving the impression that the state formally approves it.

Recent efforts of the secretary of state, the attorney general and county prosecutors cannot overcome this because most of the sales are by telephone and because it is impossible to

RIVAL BRITISH BEAUTIES

Mrs. Martin Vesey Holt, wife of London banker, acclaimed by many artists as most beautiful woman in England. They say that she has won the title formerly held by Lady Diana Cooper.

Lady Diana Cooper, daughter of the Duke of Rutland, heretofore regarded as most beautiful Englishwoman. She is coming to America this fall to appear on the professional stage.

ILLINOIS BONUS CHECKS IN MAIL FOR 30,000 HEROES

Springfield, Ill., July 15.—[Special.]—When an additional batch of bonus checks are mailed from the office of State Auditor Russell tomorrow, approximately 30,000 will have been forwarded to former soldiers since the

checks began to go out thirteen days ago. An additional 2,000 approved applications from the service recognition board, which were received Saturday afternoon, will be numbered in the office of the auditor tomorrow and sent out as soon as possible.

Employees of the auditor's office spent the greater part of today in sending out checks to world war veterans who reside in all parts of Illinois and in distant states.

The rumor that payment on bonus checks has stopped is without foundation.

At last we have found it

The perfect Fireside Chair—once the property of GENERAL HEATH of Revolutionary Fame

WHEN we found the Heath Wing Chair, after six years search for a perfect model, it was in the New England country mansion of a descendant of that famous writer and general on Washington's staff, William Heath.

The Heath Wing Chairs we make are replicas in every sense. Such a chair was the culmination of hundreds made by hand, each modeled and changed for the patrons of the cabinet-maker and purchased with a judgment born of an understanding of his art.

If quality and beauty of line mean anything, then Daners Furniture will appeal to you. All our groups for dining room, living room, and bedroom were made with careful regard for the traditions in their design.

Our Chicago Sales Rooms contain a comprehensive stock of our various groups of furniture. We are the only manufacturer offering direct to the public furniture for the entire home done in the Early American spirit. Prompt delivery can be had of your selections. Call now.

TILDEN DOWNS ALONSO IN FINAL OF CLAY COURT

(Feature on back page.)
Indianapolis, Ind., July 15.—[United Press.]—William Tilden II of Philadelphia defeated Alonzo Alonso in the final of the national clay court tennis tournament at the Woodstock club here today, and retrieved the prestige dropped when he was defeated by Tilden before Alonso a week ago.

The score today was 2-6, 6-4, 6-3, 6-2.

Not although the player from the tennis courts of old Spain was not one set, the score does not tell the story of the terrific battle put by Tilden before he emerged victorious.

Let's Is Junior Champion.
George Lott, tall Chicago youth, won the clay court junior singles tennis championship by defeating David W. Loughlin of Pittsburgh in a bitterly contested final round match, 6-4, 6-3, 6-2, 6-1.

Howard and Robert Kinney, brothers of San Francisco defeated John W. Loughlin of Indianapolis and Walter W. Loughlin of Detroit in the final round of the doubles championship in three straight sets, 6-4, 12-11, 6-3, which were marked by vicious volleying and excellent team work of the two brothers.

The lucky player from Philadelphia, winning every article of the game, found a worthy opponent in the Spaniard, who played with flaming spirit, excellent footwork and a wonderful back hand stroke.

Tilden's Strategy Wins.
Time after time in the early sets it seemed that they would hurt the ball back and forth endlessly with a mechanical accuracy before one gained the point.

Tilden showed strategy in the last set, placing his shots away from Alonso and making him run back and forth across the court.

Alonso showed at his best in the first set. He had Tilden guessing and the American seemed unable to strike his pace. Tilden was high strung and nervous. He called on the crowd repeatedly to cheer him until the point was played.

Putting himself together in the second, Tilden checked the tactics of his opponent. Neither seemed to be able to gain the advantage. By sheer stamina Tilden got over the necessary points to take his game.

Not Foot Shows Spaniard.
In the third set Tilden bombarded Alonso with cannon ball services, making stroking and stayed a bee line wide. Tilden's driving ended the handicap of a blistered foot which used him to limp noticeably as the match wore on, felt the effects of the wetting heat and was unable to be so accurate as in the first set.

Alonso held his own in the fourth and the set went 8-4. Tilden playing a smooth, consistent game and Alonso intent to remain on the defensive, he perfect were Alonso's returns a heavy blow, that Tilden was visibly worried and fighting for every point. He wore the Spaniard down.

OLYMPIA FIELDS MARATHON MEET DRAWS BIG ENTRY
BY JOE DAVIS.
Early indications point to a big field for the "72 holes in one day" event to be played by Olympia Fields Country club, July 20. Already a number of entries have been received from other golf centers, the novelty of playing 72 holes in one day over four different courses, evidently appealing to the players.

Olympia is the only private club that has a 72 hole event, over four courses.

Players will be allowed to start their 72 holes any time after 8 a. m. Chicago daylight saving time, so they can get a rest in the middle of the day if they desire. Players will compete in groups at the rate of four minutes per hole.

The club will give twelve prizes in all, the first being for low net for 72 holes and the second for low gross. Third will be for second low net and fourth for second low gross.

There is no entry fee and the event is open to members of clubs associated with the U. S. G. A. or Western Golf association. Applications must be made before July 20 to the club office, 1508 Madison Building, Chicago.

Play in the city championship of the Women's Western Golf association will start this morning at the Olympia Fields Country club. Mrs. Melvin Jones of Olympia Fields is the defending champion, having won the event for three years. Last year she defeated Mrs. F. C. Lott, Jr. in the final. Mrs. Lott will again compete, and Mrs. Edith Cummings of Omaha is entered in company with a number of other local stars. It should be a hard fight right through.

The Marquette Golf club invited tournament will start today at Marquette park. Nearly all the leading players and amateurs were invited. Other women's championships are entered. Entries made at the rate of four minutes per hole.

Goldsmith took the club's trophy in the final round at Olympia Country club when he beat a birdie 4 on the sixteenth hole. He was followed by Mrs. Lott, who was defeated by Mrs. Lott in the final.

At the Marquette Golf club, the women's tournament will start today at Marquette park. Nearly all the leading players and amateurs were invited. Other women's championships are entered. Entries made at the rate of four minutes per hole.

CARSON PIRIE SCOTT AND COMPANY

Silks of the Finer of the New Weaves in a Sale Greatly Underpriced at \$1.95, \$2.35 and \$2.65 Yard

Fresh new silks, 7,800 yards, just arrived in a special purchase, which was made to such splendid advantage that this sale becomes possible, making a savings opportunity decidedly worth-while.

At \$1.95 Yard

Silk-and-Wool Suitings
Striped and Checked Silk Shirtings
Silk and Wool Crepe Poplins

Shirting silks are 32 inches, the other fabrics from 36 to 40 inches wide. In navy blue, brown, cocoa, steel, castor, gray, and other colors, as well as black. Not every color in every weave, but all desired colors here.

Second Floor, North.

At \$2.35 Yard

All-Silk Canton Crepes
All-Silk Crepe de Chine
All-Silk Krinkled Crepes

At \$2.65 Yard

All-Silk Satin Canton Crepes
All-Silk Satin Crepe Meteors
Silk-and-Wool Russian Crepes

They are very beautiful silks, firm, fine in weave, in colors high in fashion's favor. In a word, these are the sort of silks always to be had here, but because of this sale, obtainable now at prices far below usual.

On Saturdays during July and August this store closes at 1 P. M.

Women's "Glove-Silk"

Envelope Chemises

That these are "Glove-Silk," known for its excellent wearing qualities, and may be had at such a low price, tells immediately the values offered here.

At \$2.95

In pink, orchid, peach and black and combinations of colors. Sizes "36" to "42."

Third Floor, East.

Art Needlework

A new and greatly enlarged section recently opened is devoted to the presentation of art needlework. Charming appointments serve as fitting background for these lovely articles. The section is, indeed, an inspiration, as well as a source of happiest selection. Of special interest.

Stamped bedspreads with bolster attached are of Krinkley cloth, \$4.25 each.

Stamped luncheon cloths of white art cloth, size 44 x 60 inches, hemstitched for crochet, \$1.75 each.

Stamped house dresses, already made up, very bright and attractive in color, special, \$2.25.

Stamped tea aprons, two styles in dotted Swiss and three in lawn, special, 25c each.

Second Floor, East.

Japanese Crepe Kimonos, \$2.95

Good-looking, Practical for Vacation Outfits

Their soft colorings are effective contrast to the characteristically vivid Japanese embroideries. And that they fold easily into the smallest possible space is an important feature in packing.

Copenhagen and Turquoise Blue, Also Rose and Orchid and Pink

The embroidery is done by hand and there are three different designs from which to choose.

The extremely low pricing makes selection satisfactory and economical. Sketched, \$2.95.

Quilted Robes of Satizene, Priced at \$10.75 In Pastel Shades or Dark Colors

Soft robes lined with fluffy lamb's wool and quilted all over in scroll patterns. The colors are lovely and the satizene of a particularly good quality. A really exceptional robe to find so moderately priced. Not sketched, \$10.75.

Third Floor, North.

Many Charming New Styles Replenish the Midsummer Sale of Undermuslins

As this splendid sale progresses, more and more new undergarments are added. And in every instance, quality and skill in workmanship are even more to be stressed than the pricings, which are always low enough for substantial savings.

Crepe de Chine Night-Dresses, \$3.95 and \$5.95

Tailored Step-in Drawers at \$3.95

Pleated Combinations Are Priced at \$3.95

A wide band of real Irish lace, and edgings of lace in Valenciennes patterns, are used in the night-dress, sketched at right center, \$5.95. The crepe de Chine night-dress at the right has shirring and bands of lace in Calais pattern, \$3.95.

The step-in drawers are of an exceptionally heavy quality of crepe de Chine. Sketched at the left, \$3.95. The combination with rows of pleating, sketched left center, is \$3.95.

Third Floor, North.

Boys' Sports Blouses at 75c

The Sort They Need in Plenty Now

And they may have them in plenty and in variety, too, because of this selling, which brings its well-timed opportunity.

1200 Just Unpacked
Fresh and New

Every blouse made with real care in the little details. The fabrics are firm and strong and in wanted patterns and colors. The workmanship thoroughly good, the style excellent. So that the most satisfactory service is assured.

Of Woven Madras and Oxford Cloth in White and Tan and Novelty Fabrics in Plain Colors

The collars fit well and are cool and comfortable. The short sleeves are roomy—no interference at play. All sizes from 6 to 16 years. These blouses are very unusual at 75c each.

Second Floor, East.

Imported Dotted Swisses, Special, 48c Yard

No other fabric has a wider appeal this summer than this fresh-looking Swiss, beautiful because of its fine quality.

On changeable grounds, varied in color combination, are small dots in white. The value is again stressed. 48c yard.

In an Unusual Purchase, Imported Gingham at 38c Yard

Just 4,000 yards in this purchase, a quantity not very great when one considers the price. In checks of three different sizes. Blue, pink, tan, brown, green and lavender. 38c yard.

Second Floor, North.

In the Semi-Annual Sale of FINE SHOES

Reductions in Price are Radical and Values are of Exceptional Character

THOUGH emphasis is placed upon price reduction, that would be of little importance if it were not for the high grade of the shoes and their smartness. It is this combination of qualities that makes the values exceptional—that marks this sale as the "Shoe Event" of the season. There are shoes for every occasion for women, men, boys and girls—all much underpriced.

Typical in Value and Variety Are Women's Low Shoes Reduced to \$9.45 Pair

Third Floor, South.

The Semi-Annual Sale of Towels

Featured at This Time—All-Linen Huck Towels at 85c Each

A plentiful store of snowy towels is very essential to summer comfort. So these special pricings are very welcome.

All-Linen Huck Towels, 50c Each

Hemstitched towels with damask borders in several patterns. Size 18 x 32 inches, 50c each.

Heavy Turkish Bath Towels, Hemmed and Bleached, Large Size, Special, 35c Each.

These towels are of huck with damask borders, size 20 x 36 inches, special in this sale at 85c each.

Turkish Bath Towels, 60c Each

With pink, blue or white borders, size 24 x 44 inches. In the Semi-Annual Sale at 60c each.

3,000 Yards of All-Linen Bleached Crash Toweling, Red, Blue or White Borders, 25c Yard.

Second Floor, North.

Library Table Lamps

Adaptable to Many Decorative Plans
\$18.50 and \$25

Not only adaptable, but in line and decoration these lamps continue to be appropriate even with a changing scheme of furnishing.

So that such a lamp, attractive in itself, proves ever to be a really good investment. It is suggested, too, as a gift certain of welcome.

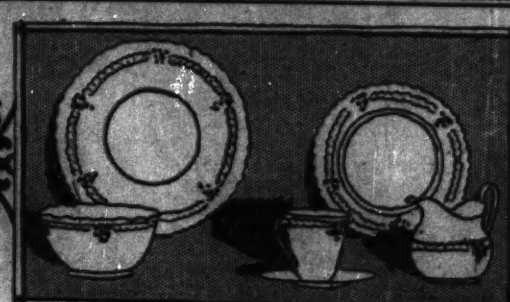

Glass Shades with Metal Bases

The shades of glass are painted by hand in charming landscapes or flower decorations.

The colorings are exquisitely blended, so that the lamp diffuses a lovely, soft glow.

There are twelve styles to choose, six at \$18.50, and six at \$25. Two are sketched.

Fifth Floor, North.

English China Luncheon Sets

The Summer Hostess Appreciates
\$15 and \$20

They are practical as they are attractive, giving a cheery, summery air to the table. A service sufficient for six people.

Of English bone china, with a charming decoration emphasized by gold lines. Two patterns, 40 pieces in the set. \$15 and \$20, according to decoration.

Yellow China Tea Sets, \$12

Really picturesque with the black lines and black handles. 23 pieces in the set. \$12.

Lemonade sets of pottery at \$10 are immensely effective in their blue and tan lustre treatment.

Flower bowls and holders of mirror black are lovely setting for gay summer flowers. \$1.50.

Fifth Floor, North.

Everything for Canning

First Featured—Preserving Kettles
75c to \$1.95

In the Housewares Section are special groups of utensils to facilitate the success and ease of summer canning. Priced for economical selection.

The kettles are of gray enamel. Priced according to capacity. 11-quart, 75c; 15-quart, 95c; 18-quart, \$1.25, and 24-quart size, \$1.95.

Aluminum Preserving Kettles, 85c to \$5.75

Of heavy gauge aluminum, in 2 to 24-quart sizes. Priced accordingly, 85c to \$5.75.

Wire canning racks of copper wire. In 8-jar capacity. Specially priced at 25c.

Round "Kol-pac" canner, 4-jar capacity, of heavy tin, 75c. Jelly glasses, 6 and 8-ounce sizes, 40c dozen.

Sixth Floor, South.

WHEAT CONTROL TOO BIG A JOB TO BE HANDLED

By CHARLES MICHAELS.

What price are the lowest of the season so far, and may go lower, unless there is a radical change in export sentiment. Chicago prices touched the highest of the season for cash wheat and nearly the highest for July wheat last week. No. 2 yellow sold at 85c. Few operators in the trade are small when a similar situation

prevailed in the wheat market of the world are looking back to the normal. The decline in prices since the recent high point, accompanied with an unusual array of depressing statements, has scared buyers and prices are back to the lowest at this time since 1914, when July wheat averaged 77c the last part of the month.

The first part of November, 1922, when wheat sold at 85c, or 35c under Saturday's close.

Traders Not Exalted.

Traders take the position that there is nothing in the world's wheat market to become excited over, or to justify undue price depression. At the same time some of the government's statisticians at Washington and a number of the economists have become excited over the belief that there is a great excess in the world's supply above demand, and they are doing more harm than good by the statements they are sending out.

There has been a great deal said by people who should know better about the wheat market situation, orderly marketing and production and consumption. At the same time nothing has been said about the steady increase in population in the United States and Canada and the world over. This must be taken into consideration in making wheat calculations.

Read a World's Exposition.

As the wheat situation is a worldwide exposition, with harvesting in some part of the world practically every day throughout the year, and with marketing going on daily, there is no occasion for a world's exposition of wheat in some one country or a shortage of excess of supply in others all of which have to be taken into consideration in making up the world's wheat situation. It is no changeable that it is the most difficult to follow and appears impossible to regulate. It will be a good thing for big producers were such a corporation possible, but it is such a big proposition that those who fully understand it say it cannot be worked out satisfactorily.

Estimates on Supplies.

Wheat supplies of wheat on July 2 of 1923, 1923, were only 20,000,000 bushels, more than last year. While there are large prospective supplies than last year, the government report of 21,000,000 bushels, compared with 20,000,000 bushels for the United States last year and the total supplies and the carry over make an average of 21,000,000 bushels, or 12,000,000 bushels less than last year. Canada has the same of a big crop which may exceed that of 1922, 1923, but harvested last year.

It was decided at the wheat conference in Washington the last week that it was necessary to get back to the previous average in wheat. Up to 1914 the average wheat acreage in the United States was 8,541,000. In 1921 it had increased to 12,000,000. From 1921 to 1922 the acreage was increased almost 50 per cent.

What prices declined 100,000 bushels at the highest of the week and showed an average of 85c at the close, which was a decline of 10c from the high of 95c for July 1922, and 10c from the high of 105c for July 1921.

The New York Times

New York, July 15.—(Special.)—

Over all markets lies the restraint imposed by the season, but continued uncertainty in the international situation in regard to reparations and a certain obscurity regarding the nature of full trade. But despite this apparent restraint, which has brought about inactivity and pronounced dullness in all directions, there is quite apparent a much more cheerful attitude in most markets.

Midsummer dullness, of course, is not an unusual phenomenon. It has developed, however, at the end of a long series of price declines in securities and commodities which possibly has had the effect of overweighing a condition which must be considered quite natural and not out of the ordinary.

Time to Get Ready

In view of the dullness, particularly after a long period of such lively trading and business activity, occurred in the last half of the second quarter of the year, the "between season breathing spell" might well be utilized as an opportunity for business to once more get on its feet. Certainly it has been a period in which financial affairs have been readjusted and set in order and it now is possible to pass more calm and critical judgment on just what occurred during the period of intense business activity at the start of the year, and to use this judgment as a basis for what accurate prophecies of the last half of the year may be made. It is not a matter of financial history, even the most years, that midsummer dullness is any indication of sagging full business.

It is Hard to Judge Europe

It is much too early to pass judgment on the results of the arm and straight from the shoulder speech demanding that order must be brought out of chaos in European affairs. The note in yet to be sent to Germany, and the reaction, as well as of Germany, must be noted. Conservative banking opinion, however, is that the atmosphere has been set by a plain statement of facts. The way for negotiations on reparations has finally been opened, and that despite all of the apprehensions expressed abroad, there is little likelihood of a breakdown of the entente.

Wheat Situation Pleasant

In our domestic affairs a decline in the market price of wheat below \$1 a bushel and weakness and irregularity in several other directions has possibly overweighed the fact that commodity prices play in our general economic scheme. It is not at all pleasant to contemplate the possibility of a tremendous wheat crop bringing the harvest that it cost to produce it, but a combination of circumstances has brought us face to face with such a prospect. One of the unhappy factors of the situation is that there appears to be no help for it. A moderately large crop of wheat is coming to harvest, to be added to a carry-over from last season, which amounts to 160,000,000 bushels.

On the other side of the picture is to be found an apathetic and Italian demand from abroad for our surplus and domestic buyers equally cautious. There the problem rests at present. No artificial stimulus of expedient, whether it be derived by governmental or other means, can replace actual, normal demand for the crop. Nor can such demand be recreated overnight. It is one of the unsettling factors in our domestic situation.

It is General Trade

The list in general trade in the United States is more pronounced because of the loss of activity early in the year. But actual, physical evidence that such a condition has taken place, and that it is not a mere paper loss, is to be found in the fact that the loss of activity is to be found in a decline of nearly 600,000 tons in unshipped orders of the United States Steel corporation, an unusually good trade indicator. But on the other hand, a more cheerful indication was given by the figures reflected a railroad business in the history of the country, and represented the third consecutive week in which loadings had exceeded the 1,000,000 car mark.

It is to the future, rather than to the past, however, at which the markets are peering. The fact that the market has declined a gain of almost 5 cents to the pound last week; that the security market reflected no further advance (and at times good resistance) and that there were moderate advances in such important commodities as copper and cotton was quite widely interpreted in our financial district as representing a warning about of southeast markets optimism.

NEW ISSUE

\$3,250,000

Penn-Ohio Edison Company

3 1/2 Year Secured 6 1/2 Gold Notes

(Closed Issue)

Dated July 2, 1923

Due January 1, 1927

Coupon and fully registered Notes; interchangeable. Redeemable in whole or in part, at the option of the Company on any interest date, on 30 days' published notice, at a premium of 1/2% on or before January 1, 1924, and thereafter at 1/2% premium for each six months of unexpired life, in each case with accrued interest. Central Union Trust Company, New York, Trustee.

The Company will agree to pay interest without deduction for the normal Federal Income Tax up to but not exceeding 2% per annum. The Company will also agree to reimburse, upon application within sixty days after payment, stockholders resident in Pennsylvania for the Four Mills Tax assessed in that State, and to refund the State Tax in Connecticut up to four mills annually, and the Massachusetts Income Tax not exceeding 6% per annum on income derived from the Notes.

Mr. James D. Andrew, President of the Company, makes the following summary in connection with these Notes:

Business and Territory

Penn-Ohio Edison Company, through ownership of common stocks, will control a group of companies supplying the entire electric power, light, and railway service in an important industrial district of Eastern Ohio and Western Pennsylvania. The population of the territory served, which includes the cities of Youngstown and Salem, Ohio and Sharon, New Castle and Farrell, Pa., is estimated at over 340,000.

Security

These Notes will be the direct obligation of Penn-Ohio Edison Company and will constitute the only secured funded debt of the Company. These Notes will be secured by pledge of the entire issues of common stock (except officers' and directors' qualifying shares) of the Pennsylvania-Ohio Electric Company, Ohio River Edison Company, The Salem Lighting Company, Pittsburgh District Electric Company (except 13 shares) and is subject to the lien of the First and Collateral Trust Mortgage of the Pennsylvania-Ohio Electric Company, the Pennsylvania-Ohio Power & Light Company.

They will be further secured by pledge of all outstanding bonds of The Salem Lighting Company which bonds constitute a first lien on that property, and by pledge of over 86% of the Preferred Stock of Pittsburgh District Electric Company.

Purpose of Issue

The proceeds from the sale of these Notes will provide funds for the acquisition of the above mentioned securities of Ohio River Edison Company, Pittsburgh District Electric Company and The Salem Lighting Company.

Earnings

The actual dividends and interest payable on the pledged securities will be at the aggregate actual rate of \$730,928, or over 3.4 times the annual interest charges on these Notes, upon completion of the present financing.

The combined net earnings of subsidiary companies for the year ended April 30, 1923, available for dividends and interest on the pledged securities, for depreciation, etc., amounted to \$872,578, or over 4.1 times the annual interest charges on these Notes.

Restrictions

No notes in excess of these \$3,250,000 may be issued under the Trust Indenture securing these Notes. No additional common stock of the subsidiary companies may be issued unless it is immediately acquired by Penn-Ohio Edison Company and pledged under the Trust Indenture.

Equity

These \$3,250,000 Secured 6 1/2 Gold Notes will be followed by \$6,000,000 30-Year 6 1/2% Debenture Bonds, \$6,359,500 6% Cumulative Preferred Stock and 248,240 shares of no par value Common Stock. The value of the physical properties of the subsidiary companies, based largely on independent appraisal, is \$58,836,000. Deducting the face amount of bonds and stocks of subsidiary companies outstanding with the public, leaves a balance in excess of \$16,700,000 applicable to the collateral pledged under these Notes.

All legal matters in connection with the issuance of these Notes will be passed upon by Messrs. Winthrop & Stimson of New York, for the Bankers, and Messrs. Beckman, Menken & Griscom, of New York, for the Company.

The above Notes are offered when, as and if issued and received by us and subject to the approval of our counsel at

Price 98 and accrued interest, to yield about 7.15%

\$500,000

The Ohio Public Service Company

First Mortgage and Refunding 6% Gold Bonds, Series C

DATED MARCH 1, 1923

DUE MARCH 1, 1933

Price 94 1/2 and interest, yielding over 6.40%

A Letter from Mr. T. O. Kennedy, Vice-President of the Company, is summarized as follows:

Service Rendered: The Company supplies electricity for light, heat and power to a number of substantial Ohio communities, including Warren, Alliance, Massillon, Ashland, Mansfield, Elyria and Lorain.

Territory: The territory served, with its favorable combination of highly developed industrial communities, is regarded as one of the foremost fields for power consumption in the United States.

Security: A first mortgage lien, in opinion of counsel, on a portion, and a direct mortgage lien on all, the Company's property subject to divisional bonds outstanding with the public (mortgages closed).

Valuation: Total depreciated value

of the Company's property, as determined by independent engineers in 1921, about \$19,700,000; subsequent expenditures for additions, etc., \$3,200,000. The Public Utilities Commission of Ohio has given the properties a valuation which with subsequent additions and improvements to May 1, 1923, is in excess of \$24,500,000. Total bonds outstanding in hands of public (including divisional issues) \$14,000,000.

Earnings: Gross, for twelve months ended April 30, 1923, as officially reported, \$7,648,425; net, \$2,674,331; annual bond interest requirement, \$991,013. Of these earnings, 93% of the gross, and 97% of the net were derived from the sale of electric current for light and power.

Fully descriptive circular 17B will be sent upon request

TRAFFIC TOWER. New structure at Michigan Avenue and Roosevelt.

CHICAGO PAYS ITS HOMAGE TO GEN. GOURAUD

French Chief Guest of Rainbow Men.

(Pictures on back page.)

"Kill Many" Gouraud came to Chicago yesterday. Five years and one day after he issued the famous order which simple words inspired his men and turned them into invincible rocks, the "Lion of the Argonne" came to visit with, to honor and to be honored by the commanders and the men who took that order literally, glancing not to the rear, yielding not one inch and killing many with the enemy's bayonet.

Chicago hailed the French commander as a Napoleonic figure. Chicago honored him as the author of the famous order to the 4th army in France—Americans and Frenchmen fighting shoulder to shoulder—which shattered the last great German offensive and crushed soon after all the military power of the Kaiser.

Returns the Compliment. And Gen. Gouraud returned the compliment. Once, speaking at a reception given him at Hotel La Salle by the Chicago Council on Foreign Relations, he said:

"My gratitude and deep homage go to the American officers who were my comrades in arms," and his mild blue eyes flashed as he looked about him and in quiet Gaelic accent, "Reilly, Foreman, Davis, Judah, Manning, Brice, Gen. Henry J. Kelly, who commanded the 149th field artillery of the Rainbow division, whose name is on the monument in the Argonne, and to our brave boys, Davis and Col. Noble B. Fitch."

He paid another compliment of his reception by the French colony of Chicago at the Drake hotel late in the day. Here he was presented with a miniature statue of the "Spirit of America," the figure of an American boy in bronze. He laid his hand reverently over the little brass doughnut helmet and declared: "This is a symbol of the Rainbow division."

Appointed U. S. Anthem. And when at this same reception a young woman sang the "Star Spangled Banner" he missed for the first time during the day his right arm, which was torn away by a shell when he was serving at the "Dardanelles." For he joined vigorously in the applause which followed the singing by beating with his open left palm on the table at which he stood. "We have mixed the blood of America and France on our battlefields over there," he said, as the applause subsided. "I find that I can applaud the American anthem with just as much vigor as I applaud the Marseillaise of France."

At the foot of Lincoln's monument in the park, Gen. Gouraud placed a wreath of great green leaves, watched by a large crowd. He laid the wreath down, bowed his head for a moment, and then turned away.

Right Sleeve Empty. Gen. Gouraud is of only medium height, slender and graceful. His right sleeve hangs empty and he walks with a slight limp, for the same shell which threw him into the air and tore away his arm also broke both his legs. Gen. Gouraud's eyes are as calm as placid blue water, and they appear to be very mild. But when he speaks they flash, their whites show dangerously, there are wilder's eyes; and his tones are curt and commanding.

Gen. Gouraud arrived at 9 o'clock in the morning. He was met at the station by three generals—Reilly, Davis, and Foreman—by former Secretary of War Jacob M. Dickinson, and a number of other officers.

Welcomed by Dever. The party went to the city hall, where Mayor Dever welcomed the Frenchman and his party, and from there to a reception given in honor of Gen. Gouraud by the officers of the 149th field artillery, Gen. Reilly's regiment. Not only men and officers were honored by the French general yesterday, for at this reception Gen. Gouraud kissed Josephine Manning Patterson, aged 8, daughter of Gen. Gouraud and his party went during the morning also to visit the headquarters, where they were the guests of the Gen. John Swift post of the American Legion. Here at the center of the great American nation industry the general recalled an instance of his early service in Africa, when camels were running low and the troops subsisted on canned meat from Chicago.

"Think that time," the general said with a smile. "I have always been a friend of the can." After his reception by the French colony Gen. Gouraud in his suite at the Hotel Drake presented Brig. Gen. Davis with the Legion d'Honneur.
